"I have no special talent, I'm just passionately curious"

About Me

Hi there! I'm José María, a professional with 2 years of diverse experience in sales, marketing, commercial assistance, and data analysis. My journey includes significant roles at Grupo Intercorp and Schneider Electric, where I was recognized for my exceptional performance.

Professional Skills:

- **Programming:** Python, R, Julia, HTML.
- **Database:** MySQL, PostgreSQL, Microsoft SQL Server.
- **Dataviz:** Tableau, Power BI, R Shiny.
- **Development Tools:** Visual Studio Code, Git.
- **Office Tools:** LaTeX, Pack Office (Word, Excel, PowerPoint).
- **Additional Tools:** SAP, Power Automate, Power Apps.

My current interest lies in data analysis, machine learning, and quantitative finance (QUANT). I handle web scraping techniques, supervised and unsupervised machine learning models, object-oriented programming, and time series models to reflect business figures. I specialize in process automation using Python or R, as well as in data visualization with Tableau and Power BI, integrating Python and R (also creating dashboards in Python or R). I have experience with Power Automate and am capable of creating applications in Power Apps.

With a background in economics and a multidisciplinary approach, I offer a unique perspective on how to shape new data visualization processes. I prefer to avoid traditional approaches and try new and disruptive ideas, iterating in the creative process. Thanks to my skills, I have had the opportunity to contribute my experience in meetings at management and director levels.

I have led projects, participated in volunteering and clubs, demonstrating my commitment to teamwork and leadership. These experiences have allowed me to develop interpersonal and project management skills, essential for success in multifaceted roles.

I am excited about the opportunity to bring my skills and experience to a new challenge. :)x

Sincerely,
José María
